

uPVC Door Panel Collection

NEW WORLD
DEVELOPMENTS

New World Developments welcomes you to a collection of modern and sophisticated uPVC door panels which will brighten and enhance your home. Each panel is carefully manufactured at New World's factory in Ballymena, Co. Antrim.

New World has been involved in the manufacture and sale of uPVC door panels since 1993 and the company supplies throughout Ireland, UK and Europe. Our online ordering system is available to all account customers and a confirmation email with the order details and price is returned to you instantly for your peace of mind. Our exclusive Panelspec system is available online or on a disk for your convenience.

Build your front door in the showroom or in the comfort of your home and a final

printout allows you to visualise exactly how your bespoke entrance system will look.

With the introduction of our unique barcoding system we can now track every panel as it passes through the production process. This ensures you are receiving the highest quality product available.

Take a few moments to browse through our range of traditional moulded panels and contemporary inverted moulded collection; we are confident you will find a style to best compliment your home.

White panels can be supplied with a foam core or with single or double ply reinforcing or with a solid core for added security. All woodgrain and colour panels are supplied with double ply reinforcing as standard.

All the uPVC door panels featured in this brochure are available in our four grained colour options as shown below. Please note there is no guarantee on any of our products in black.

There is a wide range of decorative glass units to choose from and all glass units are produced in-house. All glass used by New World is toughened glass conforming to British Glazing Federation Regulations. New World adopts a flexible approach to glass designs and will consider any bespoke designs within reason on an individual basis.

***“we are confident you will
find a style to best
compliment your home ”***

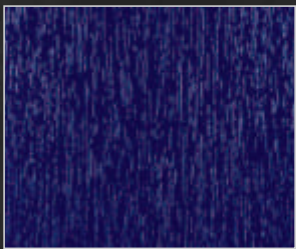

Please note our new glass designs feature a range of obscure film patterns, colour fused glass tiles with sandblasted sections, tinted glass bevels and glue chip bevels which are shown throughout the brochure. These are indicated after the glass codes.

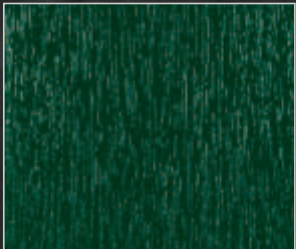

Grained Colour Options (Available in all panels)

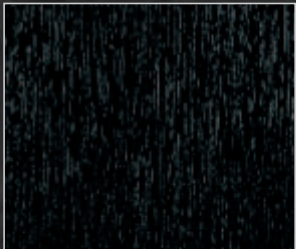

Colour code: 080

Colour code: 081

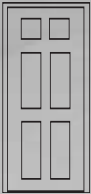

Colour code: 082

Colour code: 083

Please note: Every effort has been made to reproduce the colour options as shown in this brochure but printing constraints will give rise to some colour deviation. There is no guarantee on black.

Moulding Dimensions

Please note: Please allow a variance of 5mm for white panels and up to -10mm for woodgrain and colour ticked panels.
 * Also available in Euro size 2100mm x 900mm - exact moulding dimensions upon request.

Vintage Collection - Inverted Mouldings

The Vintage Collection is an innovative range of panels featuring inverted mouldings to reproduce the aesthetic appeal of a traditional timber door. These panels are available with a fresh new range of glass designs and can be produced in white, woodgrain and a choice of colour options.

All panels in The Vintage Collection are available in 24mm and 28mm thickness only.

All white, woodgrain and coloured panels are double ply reinforced as standard with 6mm exterior grade plywood.

The Vintage Collection can be supplied with any of the decorative glass designs featured in The Heritage Collection brochure except the resin bevels.

Q Seal

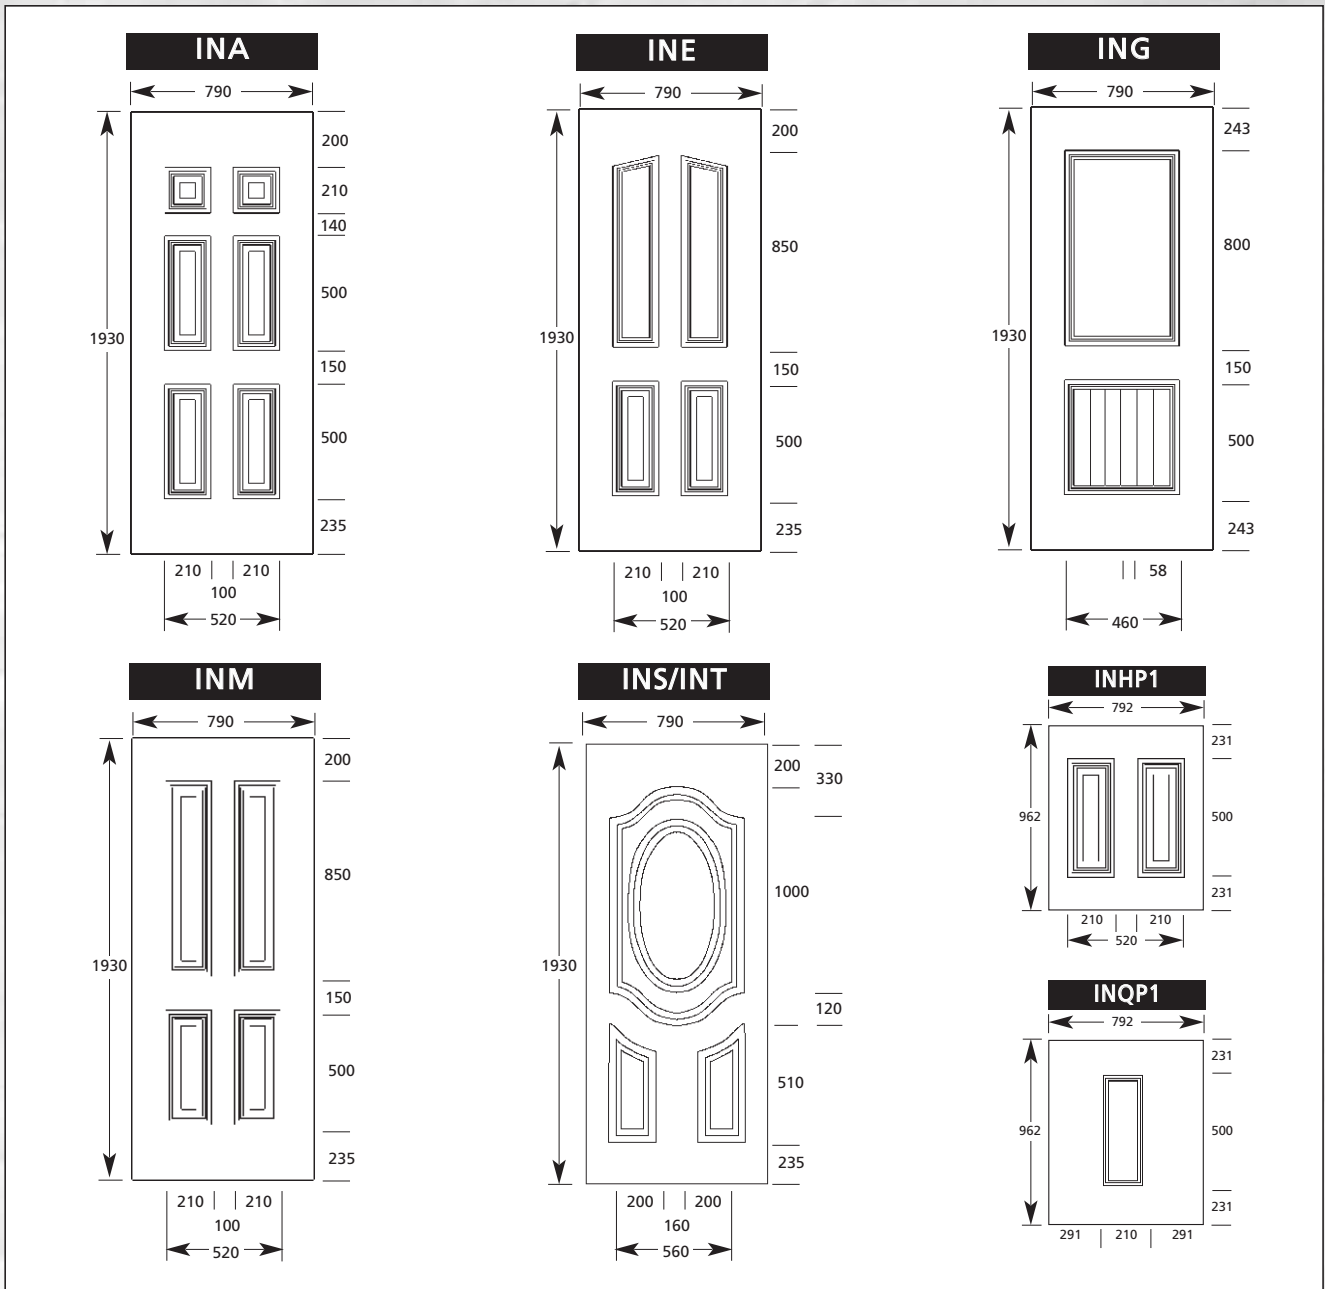

Double Glazed Units

New World Developments are proud to state that we use **Q Seal** double or triple glazed units in our panels.

We firmly believe that the **Q Seal** unit is the best double or triple glazed unit available because it offers you:

1. Longer life
2. Better thermal insulation
3. Reduced condensation
4. Looks better

Choose **Q Seal** not only for your door but your windows and conservatories as well.

Please note: Please allow a variance of 7mm for white panels and up to -15mm for woodgrain and colour ticked panels.

Brass is a material subject to attack from the elements and black pit marks may occur. This cannot be avoided.

Resin Lead Glass

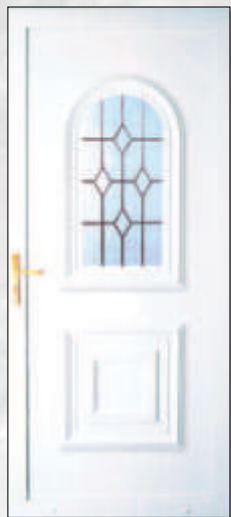

New World's glass units have traditionally been produced with antique lead, colour film and glass bevels. We are pleased to present the latest resin lead technology available throughout our range of PVC panels. Manufactured in a custom built studio our resin lead units are produced under strictly controlled conditions to the high standards you have come to expect.

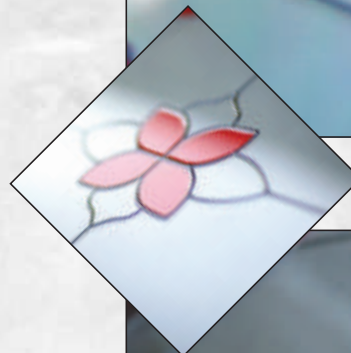

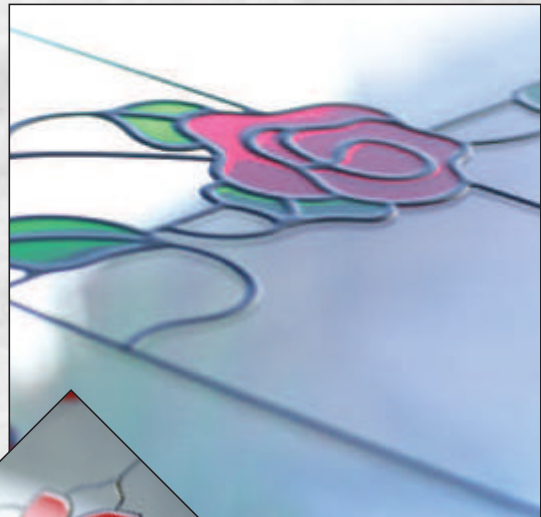

Our panels can be produced with black resin or with colour and black resin. Bevel glass designs cannot be produced with resin lead but are finished with our standard antique lead.

Resin Bevel Collection

Introducing New World's own range of bespoke resin bevel units which replace the current range on offer. Our resin units are manufactured completely inhouse using our exclusive range of design moulds. Each unit is made with sections of obscure film carefully placed around resin bevel clusters and glazed with a clear backing glass only.

Please note the resin bevel range RB1 - RB9 is no longer available as it has been discontinued.
