Slide & Swing Door

UNIQUE!

# The NEW Slide & Swing Door

## Make more of your living space inside and out

The Slide & Swing Door is a new-generation multi-pane door that enables homeowners to maximise their living space. This new door transforms ordinary rooms, opening up spaces between rooms or between the home and the conservatory or garden in a way no other 'patio' door can do.

Unlike Bi-folds, the Slide & Swing doesn't encroach on internal living room or patio space when opening or closing. And homeowners can open any part of the door for ventilation or access. It even operates as a partition. When closed, the doors interlock together creating a solid wall that is extremely secure, and far more secure than a traditional Bi-fold or inline sliding patio door.

## Key features:

- Seamless beautiful lines - no unsightly hardware
- Easy to operate - slide one panel at a time
- More living space - inside and out
- Excellent thermal and weatherproof performance
- Patented Magnaline™ slide and stack technology
- Maximum door height 2200mm, width on application
- Available in Traditional 2500

The first panel is hinged and can be on either side of the opening.

The second and subsequent panels slide up to the first panel and click into place.

Each panel then swings open and stacks parallel - providing full use of the opening

## Dimensions

- Maximum door height: 2.2m
- Minimum sash width: 0.6m
- Maximum sash width: 0.85m
